AMAZINGLY SIMPLE VELCRO® SYSTEM FOR EASY HANDLING

- Simple operation with operating rod
- Assembling between the rafter possible (internal static)
- Assembling under the rafter possible (external static)
- For plafond and roof pitches up to max. 10°

Sunola uses innovative hook and loop technology. This means that it is not only easy to install, but also easy to clean. The fabrics can be (re)washed if necessary to keep them in perfect condition at all times.

The perfect sun protection system for indoor and outdoor areas under a complete glass surface.

- Used plastics are uv-resistant.

assembling between the rafter (internal static)

assembling under the rafter (external static)

Scope of delivery:

- Ready-made fabric with sewed velcro® tapes from regular distances of appr. 400 mm (the sewing thread is UV-resistant)
- Alu profile drilled (recommendation: fixing every 50 - 100 cm)
- Alu profile with velcro® tape
- Glider
- stopper
- stopper with magnet for locking at roof pitches

Delivery without operating rod and assembling screws.

The static requirements for the installation of a shading system must be checked by the customer in advance. The warranty does not apply to field sizes outside our size specifications. In strong wind or storm the purchaser shall be individually responsible for the adequate protection of the sunola systems.
