## AMAZINGLY SIMPLE VELCRO® SYSTEM FOR EASY HANDLING

- Simple cord operation with operating handles
- Mounting of ceilings clips under the rafter
- Several systems can be mounted side by side
- For plafond and roof pitches up to max. 10°

Sunola uses innovative hook and loop technology. This means that it is not only easy to install, but also easy to clean. The fabrics can be (re)washed if necessary to keep them in perfect condition at all times.

The perfect sun protection system for indoor and outdoor areas under a complete glass surface.

## FIRST-CLASS PROTECTION AND COMFORT ALL YEAR ROUND

Sunola is **extremely versatile** and suitable for **all seasons**. In summer it protects against **intense sunlight and heat**, in autumn and winter against **radiant cold**. Regardless which weather, Sunola maintains the ideal temperature and creates a pleasant, cosy atmosphere.

- Sun protection
- Protection against cold
- Claire protection
- Easy to clean
- UV-resistant and highly lightfast
- Dirt and water repellent

### Technical information:

- Useable for terrace roof and wintergarden
- For plafond - roof pitches till max.15°  
Please note: A "cloud formation" of the fabric is not possible at roof pitches.
- System size max. 12 m<sup>2</sup>
  - width max. 4000 mm / length max. 6000 mm
  - An additional profile (middle profile) must be used for system widths more than 2000 mm. Optionally, the velcro<sup>®</sup> profile can be supported with a stabilising profile, if it is not possible to mount a middle profile (up to max. 2700 mm).
- Available colors:
  - aluminium profile rod: white, anthracite, alu look - further colors on request
  - alu profile with velcro<sup>®</sup> tape: white, alu look, accessories in matching colors
  - spring tensioner: white, anthracite
- Used plastics are uv-resistant.

### Scope of delivery:

- Ready-made fabric with sewed velcro<sup>®</sup> tapes from regular distances of appr. 400 mm (the sewing thread is UV-resistant)
- aluminium profile rods with operating cord, operating unit, glider and guiding carriages
- operating handle set for operating one CORD-system
- ceiling clips (recommendation every 50 cm)
- aluminium profile with velcro<sup>®</sup> tape and mounting hooks
- spring tensioner

without assembling screws

Child safety of interior privacy and sun screening: The operating lengths have to be produced and assembled in consideration of the EU Standard DIN EN13120. The static requirements for the installation of a shading system must be checked by the customer in advance. The warranty does not apply to field sizes outside our size specifications. In strong wind or storm the purchaser shall be individually responsible for the adequate protection of the sunola systems.
