

## Energy surcharge

Dear customers

A very turbulent year is coming to an end. Many uncertainties remain.

Due to the price corrections now received from our suppliers as well as from our energy provider, we have set the following surcharge valid as of 01.01.2023:

**The energy cost-of-living surcharge is 5.5%.**

The surcharge can be corrected both upwards and downwards, depending on further developments on the market.

Should prices stabilize at a level, we reserve the right to change the surcharge into a general price increase in the current year.

We ask for your understanding for this very pragmatic procedure and look forward to a further good cooperation.

If you are not the right contact person in your company, please forward this letter to the appropriate department/person. Thank you.

Yours sincerely

Nölle Kunststofftechnik GmbH
